

Do you work with a child, teen, or young adult in foster care who could benefit from tutoring?

www.tritgether.org
TriTogether Corp

TriTogether Corp offers free tutoring!

It might be classwork and homework, SAT prep, college essays, or organizational skills, but regardless of the topic, many students benefit from supplemental support. Below are the steps to refer a student in foster care to our program.

- 1** Fill out the referral form on our website (www.tritgether.org/student-referral) to give us some information about the student. We ask that you consider whether or not the student will be willing to fully engage and participate.
- 2** We will get in touch to better understand the student's academic goals, walk you through what to expect from our program, and outline our expectations for the student. This will include a video call with someone from TriTogether, the student, and either their social worker or foster parent.
- 3** Your student will be matched with a TriTogether tutor who can support the subjects they want to focus on and meet when it works best for them. Because both subject and schedule must align, there is sometimes a waitlist.
- 4** We'll introduce you and the student to the tutor via email, and the tutor will provide a Zoom or Google Meet link for the session. TriTogether tutors are passionate and excited to help your student reach their full potential!
